First food app where photos earn you money

One photo. **Paid forever.**

Upload a food photo. Set your commission. Every time someone orders from it, you earn — forever. No limits.

Start Swiping Free

Food photography is **broken**.

Restaurants pay influencers **\$200–\$2,000** for one post that disappears in 24 hours.

Amazing photographers have **no way to monetize** their eye for food.

And nobody gets paid when their photo **actually drives a sale**.

The Old Way

Photographer takes amazing photo

Posts to Instagram

Post dies in 24 hours

Photographer got paid once (maybe)

HungerSwipes **fixes this**.

Photos that sell get seen more. Photos that drive orders pay the photographer more. Everyone wins.

For Eaters

Swipe on real food you can order. Discover restaurants you'd never find on your own.

- ✓ Swipe discovery — not search
- ✓ Order in one tap
- ✓ Your matches saved forever

★ RECOMMENDED

For Food Photographers

Upload your best shots. Earn commission every time someone orders from one. Forever.

- ✓ 5–20% commission per order
- ✓ HungerScore™ ranking system
- ✓ Monthly leaderboard bonuses
- ✓ Set your own rates

For Restaurants

Get stunning photography that actually converts. Pay only when it drives orders.

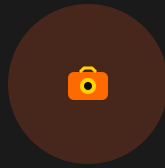

- ✓ Pay only per result

- ✓ No upfront costs
- ✓ High-converting photos

 **The Economics**

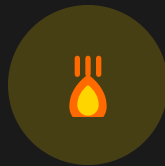

How the money flows

Simple, transparent, fair. Everyone gets paid what they're worth.

Photographer

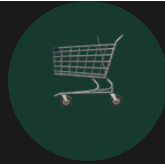

Uploads photo

HungerSwipes

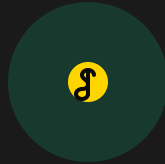

Shows to swipers

Someone orders

Eater pays \$20

Creator gets paid

10% = \$2.00

Example: \$20 order at 10% commission

Eater pays	\$20.00
Restaurant receives	\$20.00
Restaurant pays commission (10%)	-\$2.00
Platform fee (10% of commission)	-\$0.20
Photographer earns	\$1.80

Why this works for everyone

Eater pays the same price they'd pay anywhere. No markup.

Restaurant gets a new customer and only pays for results. No upfront cost.

Photographer earns money every single time their photo converts — not just once.

The ranking system that actually matters

HungerScore™ measures how well your photos convert — not just how pretty they are. Higher scores mean more visibility and more earnings.

<Heart
size= Right swipe rate
{24} What % of swipers want to order

<Flame
size= Super Hunger upvotes
{20} How many hit the fire button

<Bookmark
size= Save rate
{20} People bookmarking for later

<Dollar
size= Order conversion
{24} Actually drove a purchase
